EXCLUSIVE FLOWER SEED GROWERS

SANTA MARIA

U. S. A.

CALIFORNIA

# For the Seed Trade . . .

This booklet is our 1953 crop Contract List on all Flower Seed we expect to have available after harvest. If you find it convenient, use it as a handy order form. We will immediately mail you an itemized acknowledgment and another catalog.

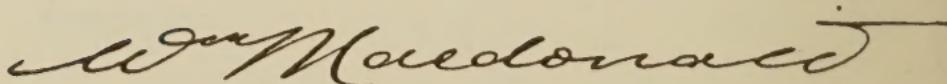

Carry-over Flower Seed stocks are once again very limited—due primarily to adverse harvest conditions both here and abroad on 1952 crop production. It will be especially advantageous for customers to order 1953 requirements early. This will protect and give you a priority on available supplies, should any shortages occur later in the season.

Flower Seed prices have not yet risen in proportion to our increased production costs. We believe you will find this contract offer reasonable and consistent with the top quality California grown seed we produce. Our section of California is world famous for quality Flower Seed. This means careful and scientific production methods—resulting in higher germinations and brighter seed samples. If speedy delivery is a factor, we can get shipments to you within 12 hours!

All of the Flower varieties we are growing for 1953 crop delivery are listed in this booklet. Also in the front section we have included descriptions of outstanding novelties. These are all fine new varieties that will greatly stimulate your sales.

If you are planning a trip to California, we cordially invite you to visit us in Santa Maria. Our fields are usually in full bloom between the middle of May and the end of September. We are located about mid-way between Los Angeles and San Francisco, on Coast Highway # 101. Southwest Airways provides excellent service here from either city.

We want to thank our many customers for the nice business placed with us during last season. I can assure you we have plans to serve you even better from 1953 crop.

A handwritten signature in cursive script, appearing to read "W. McDonald".

# Terms and Conditions of Delivery

All seeds are offered F.O.B. Santa Maria, California, for delivery from 1953 crop as soon as possible after harvest. Invoices to firms of established credit are subject to a discount of 1% for cash in 30 days from invoice date, or 60 days net. New customers should furnish two credit references if shipment is desired on an open account basis. Otherwise delivery will be made C.O.D. All foreign invoices are payable in U. S. Dollars at the current rate of exchange. All overdue accounts are subject to a sight draft without further notice.

Speedy Air Parcel Post and Air Express service can have your rush orders delivered 24 hours after we receive them. Southwest Airways Inc. makes four daily stops in Santa Maria. Air Mail from all major cities usually arrives here the day after posting. We ship Air Mail orders the same day received.

Definite shipping instructions should accompany each order placed, and will be carefully followed by our Shipping Department. In the event instructions are not received, shipments will be forwarded over the most direct and cheapest route. Delivery to the common carrier in good condition will terminate our responsibility.

Prices quoted in this catalog apply against all 1953 crop contract purchases, and are effective immediately on spot orders. We reserve the right to change these prices at any time without giving further notice. We are Wholesale Growers and supply the Seed Trade only.

Bags and containers will be charged at net cost. All orders for four ounces or more will be charged at the pound rate. Due to increased handling costs on small orders, a minimum charge of 25c will be made on each item billed.

We will plant sufficient land to produce the quantity of seed ordered under normal conditions; however, crop failure or any other cause beyond our control releases us from delivery and in the event of shortages, we will fill contract orders on a pro-rata basis only.

The William Macdonald Seed Company warrants to the extent of the purchase price that seeds or bulbs sold are as described on the container, within recognized tolerance. Seller gives no other or further warranty express or implied.

### MARIGOLD AFRICAN KON TIKI (Incurved Type)

Macdonald

"Kon Tiki"—The Sun God of the Incas—seems to perfectly describe this new pure yellow Marigold from

our extensive trial ground plantings.

It is an early flowering dwarf African variety. Flowers will average 3 inches and are of the new double Gaillardia form. "Kon Tiki" will bloom as early as the French types, grows about 18 inches tall, with flower heads standing above the foliage and each plant making very even growth.

This double Gaillardia form of flower is not as tightly incurved as regular Chrysanthemum types. It has a softer appearance and yet is an ideal cut flower variety. With Aurora, our deep golden yellow, we believe they lead the trend towards earlier flowering and smaller plants in the African Marigold family.

### TETRAPLOID SNAPDRAGONS (Tetra Type)

These are the finest Antirrhinum available for either cutting or bedding. Their tetraploid blood strains produce long tapering spikes with evenly spaced immense ruffled florets. These are all outstanding exhibition type Snapdragons.

**"Pink Shades"**—Light to deep rose pink. Freely branching with one immense spike per plant, up to 30 inches tall and having a 16 inch span of ruffled florets.

**"Sunset Hybrids"**—These have a most attractive color range of primrose thru terra cotta, to deep amber pinks—both bi-colors and solids. Base branching habit with 8 to 10 stems per plant averaging 22 inches tall. Individually large florets closely spaced cover 9 inches on a spike.

**"White"**—A pure paper white. Base branching and similar distinctive flowering habits as Sunset Hybrids.

**"Yellow"**—Very fine deep golden yellow color. Large clusters of ruffled florets carried on long tapering spikes. Height and habit are the same as Sunset and White.

### ALYSSUM PURPLE MANTLE (Procumbens Type)

Many years selection in our Trial Ground has produced uniform flat plants 10 to 12 inches in diameter and under 3 inches deep. In color tones it is an attractive deep purple violet—a bit deeper than Violet Queen.

Macdonald

Purple Mantle and Carpet of Snow are natural compliments to each other, both being of similar habit and growth. Purple Mantle stays in flower over an unusually long period, with racemes of florets making a continuous display. As plants get older, it does not have the ragged spread appearance of other Alyssum.

We are sure that gardeners everywhere will welcome Purple Mantle. It is so easy to grow and colorful for borders or mass effect plantings—where its rich purple color tones blend beautifully in the garden.

Per Lb. 25.00

### ASTER HEAVENLY BLUE (Extra Early Type)

Extreme earliness and good cutting stems make this a welcome type of Aster for the home gardener and florist. It was in full bloom before other Asters were in bud. Lacy Crego type flowers 4 to 6 inches are colored a pleasing shade of light lavender blue. Plants make a mound of bloom 18 inches tall, well branched, and each stem is a perfect cut flower. This is a very showy Aster as it comes into solid bloom.

### PHLOX GLOBE MIXED (A.A.S. 1951)

A noteworthy addition to the ever popular family of annual Phlox. Each color in the mixture is the same height and shape—forming a uniform planting that retains this habit throughout its flowering season. Color range is brilliant and complete. Plants grow about 12 inches tall and form a perfectly rounded globe.

## VERBENA ELFIN TYPES (Dwarf Compact)

Macdonald

The introduction of "Pixie" in 1950 heralded a new class of dwarf compact Verbena. Growth is upright

and a uniform 9 inches. Trusses of florets measure over 2 inches across and 15 to 20 stems comprise a single plant. Individual florets average over  $\frac{3}{4}$  inch. These attractive little plants are always a mass of flowers and never present a ragged appearance. In the various colors, one or more makes an ideal edging for any flower bed. Or if planted solid, a sparkling mass effect can easily be achieved.

## TITHONIA TORCH (New Mexican Sunflower)

Early flowered and dwarf in habit, Torch is certainly the best Tithonia for all home gardeners. Flowers are a blazing orange-scarlet color with contrasting golden yellow centers, and closely resemble the single Dahlia. Plants grow about 40 inches tall and should be planted in the open sun for best results. A.A.S. 1951.

# Sweet Peas

## EARLY OR WINTER FLOWERING

Our listing includes all of the most important Florist and Home Gardener varieties. These newer sorts feature extra strong growth, long stems, and large flowers—with many being duplexed. Winter Sweet Peas bloom at least two weeks earlier than either Cuthbertson or Summer Spencer types. This is the type for Christmas flowering—either under glass or outside in the milder climatic zones. Sweet Peas have been a Macdonald specialty for twenty-six years. During this period we have originated many current favorites. Let us send you trials for your garden or florist customers. No better Sweet Peas are available anywhere—at any price!

## SWEET PEA SUMMER or LATE

### FLOWERING SPENCER VARIETIES (HAC)

Many outstanding Sweet Pea novelties have been introduced in recent years. All of those we are listing received awards in the English and Scottish trials where this class of Sweet Pea is most popular. Also included is a complete listing of the regular standard varieties, with most of the old inferior sorts being eliminated. Please refer to page 51 for a complete color classification of Summer Flowering Sweet Peas. If we are not listing the variety you want, an equally good substitute can be found in the same color group there. Sweet Peas are a specialty item with Macdonald, over 250 acres being devoted to their culture.

## Color Classification

In addition to our regular four acre Sweet Pea Trial Ground, we recently conducted a series of color tests on every Sweet Pea variety that is offered for sale. An especially outstanding variety in each color group is indicated by two stars (★★). Those with one star (★) are highly recommended and will give fine results. All recommended varieties are vigorous growers, and will produce immense flowers on long stems.
